SUMMARY

Detail-oriented and technically skilled Software Engineer with a strong foundation in full-stack development, database systems, and application testing. Experienced in building and testing web and mobile applications, identifying bugs, and improving system performance. Proficient in JavaScript, NextJS, TypeScript, React, Flask, SQL, Python, HTML and CSS, with a background in civil engineering providing a unique perspective. Experienced in designing, developing, and maintaining scalable software systems, databases and web applications to enhance user experience and drive business success.

SKILLS

- Database Management and Security.
- Mobile App Development.
- Manual Testing & Test Case Design
- SQL & Data Validation.
- Bug Identification, Tracking & Documentation
- API Development and Integration.
- Web Design and Development.
- Agile Collaboration (Developers & Product Teams).

PROJECTS

Divine Outreach Website - Live Link

Built a Divine Outreach charity organization website that features their volunteering activities, street feeding, mentorship, team building and bible outreach for the orphans, street children and less fortunate.

- Performed functional testing across user flows (navigation, forms, responsiveness)
- Identified UI/UX inconsistencies and improved usability
- Ensured cross-browser compatibility

Real-Time Facial Recognition Web App - Live Link

- Tested real-time detection accuracy and system responsiveness
- Debugged issues related to image capture and processing
- Ensured reliability of outputs (age, name, emotion detection)

Abundance Reset Website - Live Link

Developed Abundance Reset Client website that showcases her skills with a mix of good gallery portraying what she does.

- Performed functional testing across user flows (navigation, forms, responsiveness)
- Identified UI/UX inconsistencies and improved usability
- Ensured cross-browser compatibility

Motivated Mindset Dancers Studio Website - Live Link

Created MMDS website that shows how kids are empowered in Mathare, Nairobi Kenya through dance, participations and awards won.

- Performed functional testing across user flows (navigation, forms, responsiveness)
- Identified UI/UX inconsistencies and improved usability
- Ensured cross-browser compatibility

Kalority Website - Live Link

Developed Kalority Ventures Solution company to highlight what the company offers to users and how it can be contacted.

- Performed functional testing across user flows (navigation, forms, responsiveness)
- Identified UI/UX inconsistencies and improved usability
- Ensured cross-browser compatibility

SAVIX Independent Group Mobile App - Link

- Developed and tested application features for financial tracking and group management
- Identified and resolved functional issues during development
- Validated data accuracy and system performance before deployment

Tepulse - Live Link

Created a tech-focused blog platform delivering the latest trends, insights, and news.

- Performed functional testing across user flows (navigation, forms, responsiveness)
- Identified UI/UX inconsistencies and improved usability
- Ensured cross-browser compatibility

Restaurant website - Link

Developed a user-friendly restaurant website featuring menus, customer reviews, contacts and interaction with menu (likes and orders) using JavaScript and React.

- Performed functional testing across user flows (navigation, forms, responsiveness)
- Identified UI/UX inconsistencies and improved usability
- Ensured cross-browser compatibility

EXPERIENCE

Junior Software Engineer | **Kalority Software Driven Solutions (SAVIX Project ~ Germany)** July 2024 – September 2025| Nairobi

- Developing and testing features for the SAVIX Independent Group Mobile app.
- Design and execution of complex SQL queries for data retrieval, updates, and analysis to support business decisions.
- Administering SQL databases with a focus on security best practices, including encryption and compliance with data protection regulations.
- Developing and implementing backup and recovery strategies for SQL databases, ensuring data integrity and quick restoration.
- Managing SQL Server user accounts, roles, and permissions to maintain secure and efficient access.
- Configuring and monitoring SQL Server Agent jobs for automation tasks.
- Handling password resets for networks and MIS users.
- Installation and configuration of MSSQL Server.
- Creating Kalority company website.

Key Accomplishments:

- Successfully reduced SQL query execution times by 20%enhancing system efficiency and improving data retrieval efficiency.
- Contributed to successful deployment of a live mobile application on play store.
- Successfully delivered 100% creation of Kalority company Website.
- Implemented and updated changes on the thesavix.org site.

Software Developer Intern | **Path Audiology Diagnostic Equipment Ltd.**
January 2024 - March 2024 | Nairobi

- Customized and programmed audiology devices and hearing aids.
- Configured and equipped audiology test rooms.
- Installed and set up Mira software for audiology applications.
- Managed updates and maintenance of the company website.

Key Accomplishments:

- Enhanced audiology devices' performance, leading to an increase in user satisfaction.

Lab Assistant | Hyoung & Co E.A.
March 2022 – May 2023| Chemilil- Muhoroni- Kipsitet Road Kisumu.

- Conducted tests and research on soil, concrete, and aggregate materials.
- Managed material sites and established quality standards for construction materials.
- Performed concrete testing on culvert structures.
- Preparation and Computation of tests results.

Key Accomplishments:

- Conducted tests and research on soil, concrete, and aggregate materials.
- Managed material sites and established quality standards for construction materials.

Trainee | Kenya National Highways Authority (KeNHA -Region) September 2019 – December 2019| Nairobi.

- Conducted materials testing on aggregates, soils, and concrete.
- Designed road alignments and cross-sections.
- Prepared monthly reports and Interim Payment Certificates.
- Planned and supported road maintenance works and conducted survey.

Key Accomplishments:

- Timely preparation of monthly reports and Certificates, facilitating efficient project financial tracking and payments.

Trainee | Batch Associates & Shah Technical Consulting Firm (Muruny-Siyoi Dam) September 2018 – December 2018| West Pokot.

- Conducted topographic and site surveys.
- Inspected earthworks, drilling operations, grouting, and concrete works.
- Performed tests on soil, aggregates, water, and concrete.
- Designed culverts and road alignments.

Key Accomplishments:

- Enhanced inspection processes, leading to a reduction in construction errors.

CERTIFICATIONS

- **Complete Microsoft SQL Server Database Administration Course**: Udemy.
- **Complete JavaScript Course 2024**: Udemy.
- **Understanding TypeScript**: Udemy.

EDUCATION

Moringa School | Certificate in Software Engineering.	2023May-Nov.
The Eldoret National Polytechnic | Diploma in Civil Engineering.	2017 – 2021.
Friends School Kimang'eti Girls | Certificate of Secondary Education.	2013 – 2016.
Highrise Education Centre | Certificate of Primary Education.	2009 – 2012.
Brainhouse School | ECDE and Lower Primary.	2004 – 2011.

CLUBS

- **Christian Union**: The Eldoret National Polytechnic.
- **Kenya Scouts:** Nandi North Subcounty.
- **Science and Engineering Fair**: Friends School Kimang'eti Girls.
