SUMMARY

A dedicated and versatile full-stack software engineer with a strong focus on database management, Mobile Development and expertise in both front-end and back-end development. Proficient in JavaScript, NextJS, TypeScript, React, Flask, SQL, Python, HTML and CSS, with a background in civil engineering providing a unique perspective. Experienced in designing, developing, and maintaining scalable software systems, databases and web applications to enhance user experience and drive business success.

SKILLS

- Database Management and Security.
- Mobile App Development.
- API Development and Integration.
- Web Design and Development.
- Software system design.
- Software Development Methodologies.

PROJECTS

Real-Time Facial Recognition Web App - Live Link
Built a real-time facial recognition web app that captures webcam images and identifies faces using vision frameworks, detects age, name and emotions.

Abundance Reset Website - Live Link
Developed Abundance Reset Client website that showcases her skills with a mix of good gallery portraying what she does.

Motivated Mindset Dancers Studio Website - Live Link
Created MMDS website that shows how kids are empowered in Mathare, Nairobi Kenya through dance, participations and awards won.

Kalority Website - Live Link
Developed Kalority Ventures Solution company to highlight what the company offers to users and how it can be contacted.

SAVIX Independent Group Mobile App - Link
Developing App features for this app to be used by groups as a basic ledger that tracks member savings, lending and group cash balances.

Teacher/Author personal website - Live Link
A teacher's personal website that has simple user experience showing the services offered, books written and how institutions and individuals can book for a talk session.

Tepulse - Live Link
Created a tech-focused blog platform delivering the latest trends, insights, and news.

Population Data App – Link

Built a web application for visualizing and analysing population data.

Restaurant website - Link

Developed a user-friendly restaurant website featuring menus, customer reviews, contacts and interaction with menu (likes and orders) using JavaScript and React.

EXPERIENCE

Junior Software Engineer | **Kalority Software Driven Solutions (SAVIX Project ~ Germany)** July 2024 – September 2025| Nairobi

- Developing and testing features for the SAVIX Independent Group Mobile app.
- Design and execution of complex SQL queries for data retrieval, updates, and analysis to support business decisions.
- Administering SQL databases with a focus on security best practices, including encryption and compliance with data protection regulations.
- Developing and implementing backup and recovery strategies for SQL databases, ensuring data integrity and quick restoration.
- Managing SQL Server user accounts, roles, and permissions to maintain secure and efficient access.
- Configuring and monitoring SQL Server Agent jobs for automation tasks.
- Handling password resets for networks and MIS users.
- Installation and configuration of MSSQL Server.
- Creating Kalority company website.

Key Accomplishments:

- Successfully reduced SQL query execution times by 20% and improving data retrieval efficiency.
- Successfully delivered 100% creation of Kalority company Website.
- Successfully developed SAVIX Independent Group mobile App and deployed live on Play Store.
- Implemented and updated changes on the thesavix.org site.

Software Developer Intern | **Path Audiology Diagnostic Equipment Ltd.**

January 2024 - March 2024 | Nairobi

- Customized and programmed audiology devices and hearing aids.
- Configured and equipped audiology test rooms.
- Installed and set up Mira software for audiology applications.
- Managed updates and maintenance of the company website.

Key Accomplishments:

- Enhanced audiology devices' performance, leading to an increase in user satisfaction.

Lab Assistant | Hyoung & Co E.A.

March 2022 – May 2023| Chemilil- Muhoroni- Kipsitet Road Kisumu.

- Conducted tests and research on soil, concrete, and aggregate materials.
- Managed material sites and established quality standards for construction materials.
- Performed concrete testing on culvert structures.

- Preparation and Computation of tests results.

Key Accomplishments:

- Conducted tests and research on soil, concrete, and aggregate materials.
- Managed material sites and established quality standards for construction materials.

Trainee | Kenya National Highways Authority (KeNHA -Region) September 2019 – December 2019| Nairobi.

- Conducted materials testing on aggregates, soils, and concrete.
- Designed road alignments and cross-sections.
- Prepared monthly reports and Interim Payment Certificates.
